COURSES BEGIN 2/3/25

DIGITAL LEARNING BIG SIX WINTER CLASSES

Explore Adobe, Canvas, Google, Nearpod, and Canva, Mastery Connect, and SchoolAI

Flex Learning Model

Classes have synchronous and asynchronous components

Earn as you Learn

- Earn $200 for completing the course*
- Earn $350 for implementing tech in class with DTL Specialist
- Earn $250 for leading a school tech training

*Must be a JSD 2025 Winter Course. Cannot be a course previously taken.

Digital Learning in 2024-2025

Digital Teaching and Learning appreciates your interest in our digital learning program during the 24-25' school year. Our program includes stipends as you complete three steps in working with technology in your classroom. As you complete each step, in order, you will receive that stipend.

Step 1-Complete a Technology Course through JSD

You should have applied for one of our district technology courses during January. These classes use a flex model - with elements both synchronous and asynchronous to complete the course. You must complete all assignments and submit them in Canvas to qualify for the stipend ($200). You can receive one set of stipends per session, so only sign up for one course at a time.

Step 2-Work with your Digital Learning Specialist to develop and teach a tech-enhanced lesson

After completing your technology course, connect with your Digital Learning Specialist to develop a tech-enhanced lesson using an activity with the digital tool from your course. These lessons should be reviewed by the specialist and submitted in Canvas along with a reflection about your teaching experience ($350).

Step 3- Teach your peers in a Tech PD Training

The final step in your technology journey involves teaching your colleagues in a PD in-service. Share your technology knowledge by leading a Tech Training in your building about the skill (s) you developed this year. Work with your Digital/Instructional Coach to coordinate your presentation and submit your assignment/reflection in Canvas ($250).

For questions about the program, please contact Jared Covili, Digitial Teaching and Learning Consultant, at jared.covili@jordandistrict.org or 801-567-8191
