

# Artificial Intelligence for K-12 Education

## WHAT:

A comprehensive learning experience designed for educators, administrators, and other K-12 education leaders. Educators who complete this learning experience may-be eligible for a \$200 grant.

## WHY:

Artificial Intelligence(AI) can play an essential role in Utah K-12 schools. This program is designed to support community exploration and growth in order to empower Utah educators with the skill required to use AI tools appropriately and effectively in the classroom. As well as modernize student experiences related to digital literacy and career readiness.

## HOW:

- Engage with the pre-work survey
- Request or attend an initial training (1-hour)
- Complete the post-work
- Design an AI infused lesson plan
- Submit your lesson materials
- Grant awarded based on funds and rubric requirements
