## Bring Conservation Into Your Classroom!

Monarch butterflies are in trouble, and your students can be part of the solution! Utah's Hogle Zoo invites schools to join the Monarch Conservation Program, a hands-on, real-world project that connects classrooms with conservation.

### *Plant a Garden*

The zoo will help guide you in designing a garden that can grow milkweed and other native pollinator flowers that monarchs depend on. Seeds, in-person classroom visits, custom lessons and more are all included! This program is free to participate in.

### *Monitor for Monarchs*

Track eggs, caterpillars, and butterflies to contribute to community science. The more we know about these amazing bugs, the more we are able to help protect them.

### *Learn & Lead*

Students will become champions for Utah wildlife by gaining conservation skills and becoming champions for pollinators in their very own communities.
